Data Visualization / Reporting Analyst

Location: Battersea, London

Liv-ex is the global marketplace for the wine trade, with over 500 members worldwide. We offer B2B services that span trading, data, logistics and technology to a diverse group of wine businesses – from ambitious start-ups to established merchants.

Our goal is to make fine wine trading more transparent, efficient and safe for the benefit of our members and the market as a whole. We are hard-working, committed yet informal, energetic and action oriented.

Founded in 2000, Liv-ex has grown to serve a growing number of merchant members with a broadening range of services. We help clients and other stakeholders to better understand the fine wine market and identify opportunities to profit.

As a result of this continuous growth, we have realigned our data team to support future business needs. Consequently, we have a new role focused on data visualization and reporting to fill. If you are a smart, enthusiastic, tech savvy graduate with at least 12 months experience in a technical/data environment looking for an opportunity to be hands on and learn about the value and impact data has on our clients and our business, then this is the ideal role for you.

Summary Purpose

This is an exciting opportunity to become a vital part of our data & insights team. Reporting to the Head of Data, the successful candidate will be an important member of a small data team, working alongside the Software Engineer and the Business Data Analyst to create graphics, dashboards and reports to monitor business performance. The role combines regular activities and ad-hoc projects around the responsibilities below.

Responsibilities

- Create visually stimulating graphics that provide insight into key data points
- Communicate the results of data analysis in written and verbal form to managers and stakeholders on a regular basis
- Develop ideas and notifications to highlight changes and trends in the data
- Communicate the requirements using appropriate documentation
- Manage and maintain existing Qlik View dashboards
- Work with the insights team to simplify and migrate existing dashboards to Qlik Sense
- Work closely with key stakeholders to identify, track & resolve any data concerns.
- Design business analysis and data recording systems for use throughout the departments

Knowledge, Skills and Experience

Essential
- Degree educated in a quantitative field (Engineering, Math, Science, Computer Science, Economics or similar)
- Advanced knowledge of MS Excel (e.g. experience with pivot tables) and SQL
- Strong data visualisation skills and experience with Qlik products
- Good organisational skills to deliver projects in time
- Fluent in English, both technical and conversational
- Have an interest in building dashboard and business reports
- Strong communication skills and analytical, detail-oriented thinking
- Ability to work independently and as a member of a cross-functional team

Desirable
- Knowledge of Python, R or other interpreted language
- Experience with cloud based data warehousing (Redshift)
- Familiarity with analytics tools on Amazon Web Services
- Knowledge of data modelling technique

To apply, please send a copy of your CV with a cover letter to outline why you are interested in this opportunity to our HR team at clientresourcing@strattonhr.co.uk.
